Functional & Performance Testing

Template Model Performance Test

Date	17 Feb 2026
Team ID	LTVIP2026TMIDS84828
Project Name	Financial AI Analyzer – Transforming Complex Data into Actionable Insights
Maximum Marks	

Test Scenarios & Results

Functional Testing

Test Case ID	Scenario (What to Test)	Test Steps (How to Test)	Expected Result	Actual Result	Pass/Fail
FT-01	Analyze Button Visibility Without Dataset	Do not upload any dataset	"Analyze Data" button should not be visible	Button not displayed until dataset upload	Pass
FT-02	Invalid File Format Upload	Upload unsupported file (.pptx)	System rejects file and shows error	Error message displayed for unsupported format	Pass
FT-03	Supported Dataset Upload	Upload valid CSV/Excel financial dataset	Dataset should load and preview correctly	Dataset preview displayed successfully	Pass
FT-04	Financial Data Analysis	Upload financial dataset and click Analyze	Financial insights and charts generated	Structured financial report generated	Pass
FT-05	Trend Detection	Upload dataset with revenue data	System detects trends and displays graph	Revenue trend chart generated	Pass
FT-06	Empty Dataset Handling	Upload dataset with missing values	System should notify user about incomplete data	Warning message displayed	Pass

Test Case ID	Scenario (What to Test)	Test Steps (How to Test)	Expected Result	Actual Result	Pass/Fail
FT-07	Financial Query Response	Enter query “Show revenue trend analysis”	AI generates structured financial insight	Structured response generated	Pass
FT-08	Financial Dataset Comparison	Upload dataset and request comparison of metrics	System compares financial indicators	Structured comparison generated	Pass
FT-09	Financial Recommendation	Enter query “Give financial improvement suggestions”	AI provides financial recommendations	AI recommendations generated	Pass
FT-10	Domain Restriction Validation	Enter non-financial query	System politely restricts response to financial domain	Assistant declined unrelated query	Pass

---

Performance Testing

Test Case ID	Scenario (What to Test)	Test Steps	Expected Result	Actual Result	Pass/Fail
PT-01	Dataset Analysis Response Time	Upload dataset and measure processing time	Stable response within acceptable time	Avg 6–10 seconds	Pass
PT-02	AI Assistant Response Time	Send financial query and measure response time	Stable response within acceptable time	Avg 5–8 seconds	Pass
PT-03	API Stability Testing	Perform multiple dataset uploads and queries	No crash or system failure	System handled repeated API calls successfully	Pass

Test Case ID	Scenario (What to Test)	Test Steps	Expected Result	Actual Result	Pass/Fail
PT-04	Session Stability	Use assistant continuously for extended time	Session state should persist	Session maintained without reset	Pass
PT-05	System Reliability	Observe UI during dataset analysis	No freezing; loading indicator shown	UI responsive with loading indicator	Pass
PT-06	API Error Handling	Simulate API failure or limit	Proper error message displayed	API error handled correctly	Pass
